

## Task script (for user)

### **SCENARIO 1 & Normal Ametuer Surveory**

#### **Device : Mobile Phone**

You are a new user and have registered for an account. You have an interest in trees and are a amertur surveyor interested in protecting tree species in Hong Kong. You are outdoors, and will use the mobile version of the website to complete the tasks outlined below.

#### Tasks

- 1) Login
  - 2) See if your previous surveys have been approved or denied. What do you see?
  - 3) Create a new survey
  - 4) Submit the survey
  - 5) Use the AI tool to upload an image of a tree, was the prediction correct?
  - 6) Is your survey pending? What do you see?
- 

### **SCENARIO 2 & Admin or Moderator**

#### **Device : Laptop**

You are an Administrator for HK TREE WATCH, you are also a professional survey and are quite an expert. Your tasks are outlined below.

- 1) Login at the main screen, see your dashboard, what do you see?
- 2) Approve 2 surveys and deny 1.
- 3) Review the other surveys in the list, and delete 1 one of them.
- 4) Visit the master tree list on the side menu. Add a new tree species. Filter the tree list.
- 5) View the user roles, edit 1 user and delete another.
- 6) Exit the application.
